

OPCON CONTINUUM

The OpCon you trust,
reimagined for what's ahead

GENERAL AVAILABILITY

Q4 2026

CONTINUES

Your work carries forward.

Jobs, workflows, agents, and connectors all bridge through the Relay—no rip-and-replace, rebuild, or data loss.

TRANSFORMS

Your daily experience improves.

Everything your team touches in OpCon is faster, simpler, and more capable—and deploys are now instant.

ACCELERATES

Your automation journey evolves.

The future of banking asks more of your automation, and Continuum is built to answer the call.

What's New +

Easier to use

A refined, modernized interface puts what you need at your fingertips, with fewer clicks and less jumping between screens. Your team knows where things are without hunting for them, gets up to speed fast, and needs less training.

Zero-downtime upgrades

Updates roll out while your jobs keep running with no install, cutover, or maintenance window. Bid farewell to late nights, scheduled upgrade windows, and coordinating downtime across other systems just to stay current.

Build faster

An improved workflow builder puts jobs on one drag-and-drop canvas, with native versioning on every save. Build a change, move it into test and production in a few clicks, and roll it back anytime if it misbehaves.

Troubleshoot smarter

Find the cause fast and get processing back on schedule sooner. A troubleshooting timeline rewinds any run to the moment something went wrong, and you can quickly find what you need with global search.

Secure by design

Remove OpCon from your next audit. Our team and leading-edge AI security models test everything in OpCon Continuum before every release, and every vulnerability found is resolved before it ships.

Ready for OpCon Continuum? +

Choose the next step that's right for you.

1

Book time with your CSM
to walk through your upgrade path.

2

Join the webinar series to explore
the full Continuum experience.

3
